Affinity FS 624 Floor Sump

Affinity FS 624 Floor Sump

For people who want to add that custom look to their garage. The FS 624 is a great selling feature that instantly adds a nice, clean, finished look to the garage floor.

The FS 624 will keep major debris from entering the sewer system while handling more volume of waste or water than a traditional drain.

Great for anyone who does work in their garage, for example, car enthusiasts, do-it-yourself mechanics, hunters, etc.

FS 624 Features

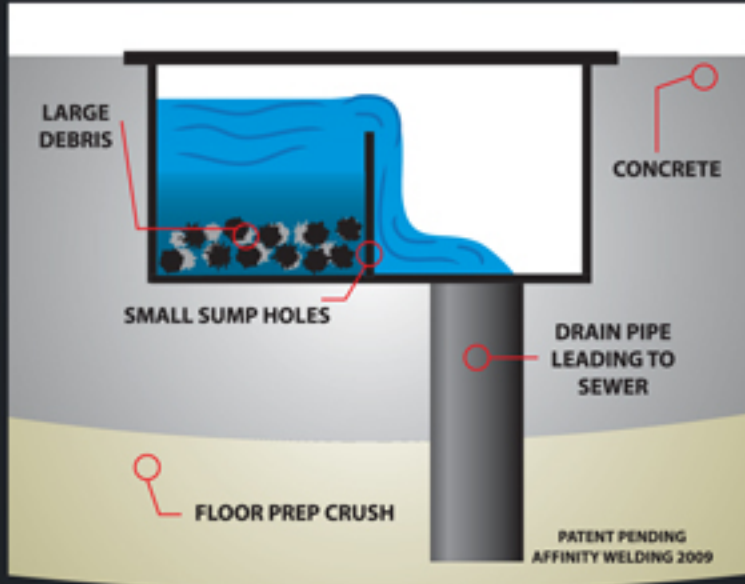

- Steel Construction
- Durable powder coated finish for long life.
- Removable covers allow for easy access and clean up.
- Custom logo application and custom colors available.

Affinity FS 624 Floor Sump

Affordable. Easy to Install.
Completely customizable.
Great Selling feature for any new home.

Substantially less floor prep than traditional concrete formed sumps.

With no forming, installation of the FS 624 cuts down on labor costs.

Simple installation saves time and money!
Sumps are tied to the rebar, tying directly to the structure of the floor.

Ready to install at any time, no last minute panic to get forms put in.
